STENDERS – The Brand

STENDERS is a cosmetics brand inspired by **richness and diversity of nature**. Our products are a living proof to nature manifesting itself through **unique textures** and **mesmerizing aromas**, joyous colours and a touch of nature in every element. By witnessing **exquisite gift wrapping** rituals and indulging in wellness rituals with our products, STENDERS is **awakening your senses** and bringing joy to every day of your life.

Elements of Nature – our Source of Inspiration

For us, nature means so **much more than just a plant** or a flower. We draw our **everyday inspiration** from all the **elements around us**, making our lives fulfilled and vibrating in harmony with the universe.

From the evergreen forests to lush, blooming meadows, from the depths of the seas to the highest peaks of the world – **nature** is full of elements and **energy of life**. We know how to **entice the deepest secrets** from plants, flowers, rock, water and fire and create unusual and **powerful combinations** giving our **skin** and **senses** the feelings you desire the most. As **feelings are a part of nature**, and STENDERS is your **Gardener of Feelings**.

Jānis Bērziņš Zane Stavra

STENDERS comes from a small, yet astonishingly **beautiful country of Latvia** – a land surrounded by the amber **sea**, covered in moss **marshes**, golden **meadows** and rejuvenating **forests**.

STENDERS was **born in 2001** and the very first store was opened in the very heart of Latvia – **Riga** by a young and ambitious couple. Brand's success story started with **home-made soap** presented in an extraordinary way.

They used **ancient Latvian knowledge**, in making the soap, and the recipes mainly consisted of **natural ingredients** – plant extracts, essential oils, rose buds and dried herbs. **Nature** was also present in the shop – **flower** bunches at the ceiling, various plants in **gift** wrapping and the **so-distinctive scent**.

The shop **became popular** very soon. In 2003, there was not a single Christmas tree in Latvia that would not have at least one **STENDERS gift box** under it.

There were customers who literally fell in love with the **special products** and **creative concept** of STENDERS. They themselves wanted to become owners of such shops, and they were granted such opportunity.

This is how STENDERS **started to go global** and the concept of STENDERS **franchise** was born. During the following years, STENDERS **faced changes** that adapted the brand for different countries and cultures.

That was the key to **expanding product range** – the wide range of soap was supplemented with other cosmetics gradually filling shop shelves with **a full range** of facial, body and hair care products for both **everyday use** and **special beauty rituals**.

A **strong team of experienced specialists** was set up and in 2014 STENDERS opened a **largest privately owned laboratory** in the Baltic region.

By 2015, more than **70 new products** are being launched and **new markets** are being conquered every year. The brand continues to change and **expand internationally**.

The change is always in progress as change means **development**.

STENDERS feelings have already been captured in more than **280 products** and inhabit more than **200 enchanted stores** in already **27 countries** worldwide.

SKINCARE

Created with superbly effective ingredients, our moisturising and truly caring creams, toners, scrubs, serums, and lip care products will let your facial skin glow day after day.

Wild Rose deep moisture skincare
